

INBRED MAIZE LINE PH7CH

Joseph Kevin Gogerty

Abstract

5 An inbred maize line, designated PH7CH, the plants and seeds of inbred maize
line PH7CH, methods for producing a maize plant, either inbred or hybrid, produced by
crossing the inbred maize line PH7CH with itself or with another maize plant, and hybrid
maize seeds and plants produced by crossing the inbred line PH7CH with another maize
10 line or plant and to methods for producing a maize plant containing in its genetic
material one or more transgenes and to the transgenic maize plants produced by that
method. This invention also relates to inbred maize lines derived from inbred maize line
PH7CH, to methods for producing other inbred maize lines derived from inbred maize
line PH7CH and to the inbred maize lines derived by the use of those methods.
